DETAILED ACTION

Priority

1. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Important Note: It is believed that the present application should instead be a divisional of 10/178,506 (now US Patent No. 6,715,660), rather than a continuation, as application No. 10/178,506 was subject to a restriction requirement.

Specification

2. The disclosure is objected to because of the following informalities: in the preliminary amendment to the specification, "continuation" should be replaced with "divisional", and the status of the application should be updated to show that it has issued as US Patent No. 6,715,660 (see paragraph above).

On page 16 (6th line), "thought" should be changed to --though-- before "not".

On page 25, 10th line, "heat" should be changed to --heating--.

On page 33, $3^{\rm rd}$ line from the end, "chocolate" should be deleted.

Appropriate correction is required.

Application/Control Number: 10/770,706 Page 3

Art Unit: 1725

Claim Objections

3. Claims 22-27 are objected to because of the following informalities: in the 1st line of all claims, the claim dependencies are incorrect, as these claims have been cancelled. In claim 24, 2nd line, replace "of" with "as" after "formed". Appropriate correction is required.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 21 and 26-28 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 35-37 and 39 of copending Application No. 10/770,027. Although the conflicting claims are not identical, they are not patentably distinct from each other because both applications are drawn to semiconductor device manufacturing methods that share the following common features: preparing an assembling apparatus comprising a cover with an opening, provided on a setting base comprising a heating function; setting a plate-like

Application/Control Number: 10/770,706 Page 4

Art Unit: 1725

substrate having conductive patterns mounted on the setting base; mounting a semiconductor chip to the substrate or wire-bonding electrodes of the semiconductor chip to the conductive patterns through the opening, wherein an illumination is disposed above the opening and a blowing device is provided at a periphery part of the illumination, and a pattern recognition camera and a lens barrel is disposed above the illumination. One of ordinary skill in the art would have recognized that the means for filling the interior of the current application is analogous to the blowing device that prevents a fluctuation of an inert gas (inherently provided from an inert gas source).

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 7. Claims 21-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With regard to claim 21, it is unclear what is meant by "a periphery part of the illumination", as the entire apparatus should be exposed to the "illumination".

Application/Control Number: 10/770,706

Art Unit: 1725

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure. In addition to the applicants' related patents, the Wicen.

Yoshida, and Sakai et al. references are also cited in PTO-892.

9. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dr. Kevin P. Kerns whose telephone number is (571)

272-1178. The examiner can normally be reached on Monday-Friday from 8:00am-

5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
